

scheda tecnica di preinstallazione / technical details

art. FN135 vasca FONTANA.

art. FN135 FONTANA bath tub.

PREPARAZIONE DEL PAVIMENTO: predisporre uno scasso nel massetto per alloggiare il sistema di scarico, rispettando le misure indicate in figura. Le quote sono da intendersi a pavimentazione ultimata. La quota X è indicativa e dipende da come si vuole installare la vasca. Con $X=47,5$ cm (misura minima) la vasca Fontana è a filo con la parete. Posizionare un tubo di scarico $\varnothing 40$ mm come illustrato (la direzione dello scarico può essere destra o sinistra).

FLOOR SETTING: cut an area for the drainage system in the floor, after having prepared the sand/cement mixture, carefully following the measurements indicated in the drawing (they are meant after flooring). The X dimension is for example only and it depends on the final position of the bath tub. $X=47,5$ cm means that the FONTANA is flush to the wall. Place a 40 mm diameter pipe as shown (outlet can be on the left or right).

Technische Details

art. FN135 wanne FONTANA.

art. FN135 baignoire FONTANA.

FONTANA MINIA.

VORBEREITUNG DES BODENS: Stellen Sie für die Vorbereitung des Ablaufes, nach Einbringen des Estrich, eine Aussparung, mit den in der Skizze angegebenen Maßen, im Boden her. Führen Sie den Ablauf wie in der Skizze beschrieben in die Aussparung ein. Das Ablaufrohr kann links oder rechts platziert werden.

PRÉPARATION DU PLANCHER: Réserver une zone pour le siphon, respecter tous les mesures indiquées sur la photo. La mesure X est seulement indicative et dépend d' où on va positionner la baignoire. Si $X=47,5$ cm la baignoire est à côté du mur. Comme montré, poser un tube avec diamètre 40 mm.
